

# Note Taking Webapp

A creative webapp which allows user to store their valuable information.

---

**Team No. 20**

**Problem Statement:** Noting Web App

An app to take notes in classes. So,  
develop a web app that can be used to take notes in classes.

# Utilities of this webapp:

---

- This webapp provides you with two formats.

**(i) Note writing :** An effective online method to write notes. Users can store their valuable information about different subjects.

Their write-ups can be saved and thus viewed later.

**(ii) Sketching :** Since notes is not just about writing text, so this webapp also provides it's users an interface to draw.

The Sketching cursor's width can be increased or decreased.

Also, they can download their sketch in PDF format.

# Technology Stack

---

## Front End

- HTML
- CSS
- JAVASCRIPT
- JQUERY
- BOOTSTRAP 4

## Back End

- PHP
- MYSQL

# Application Code Description

---

- Note can be taken , stored and deleted using our webapp.
- User can sign in and log in using our webapp.
- The webapp is secured with SQL injection as it uses prepared statement.
- The webapp has a fully stable login and logout system.
- User can download the sketch as a pdf format from our website.

The End
